## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Sekiguchi Hiroshi (JP 06-045667).

Regarding claim 1,

Figures1-10 illustrates a solid state laser including a slab shape medium (11), a flow path (16) for circulating coolant, paragraph [0021] discloses the zigzag fashion and discloses the slab shape medium including mirrors in the optical path.

Regarding claim 2,

Figure 1 illustrates flow shaping member (17).

Regarding claim 3,

Sekiguchi Hiroshi discloses coolant cooled slab shaped medium, where in figures 1-10 illustrates the narrowing of the coolant path through dashboards (140) which implies the flow of the coolant increasing in the rate of flow [applicant's turbulent flow] at the narrowing section.

Claim Rejections - 35 USC § 103

10/573,114 Art Unit: 2828

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sekiguchi Hiroshi (JP 06-045667) in view of Goto Tetsuo (JP 2001-015844).

Sekiguchi Hiroshi discloses coolant cooled slab shaped medium, but is silent as to the slab shaped medium including an optical member for spontaneous emission absorbing and a heat insulator.

However, it is well known in the art for coolant cooled slab shaped medium to include a spontaneous emission absorber and heat insulators, as described by Goto Tetsuo in paragraphs [009]-[0014].

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sekiguchi Hiroshi (JP 06-045667) in view of Kasai Takeshi et al (JP 06-216438).

Sekiguchi Hiroshi discloses coolant cooled slab shaped medium, but is silent as to the O-ring.

However, it is notoriously well known in the art to the provide fluid cooled slab shape medium with a seal, as described by Kasai Takeshi et al in paragraph [0026]-[0027].

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ARMANDO RODRIGUEZ whose telephone

number is 571-272-1952. The examiner can normally be reached on 9:00 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MINSUN HARVEY can be reached on 571-272-1835.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
